

# LTT-22107 Career Planning 2020, Science and Engineering

## Self-assessment exercise

**Student name:** Trinh Gia Huy

**Student number:** H290290

**Student email:** giahuy.trinh@tuni.fi

- What gives you energy?

A book and a cup of coffee will give me energy for working day.

- What costs a lot of energy to you?

Social media to me is still a source of consuming a lot of time and energy.

- Name one challenge you overcame and how:

Study abroad is one of the many challenges for me. At first, it was really hard to overcome since there are so many difficulties: language barrier, strict weather and home sick. However, I have overcome it by various ways: adopt to new environment, open network with new international students,

- What usually motivates you?

A scientific paper motivates me everyday to improve my skill and knowledge.

- What would you like to learn?

Now I would love to learn new knowledges in my specification and related branch. For example: I would love making research and focusing on networking and signal, image processing.

- What would you like to achieve when it comes to work?

I want to learn new skill and gain new knowledge everyday when coming to work.

- Which qualities would you like to be able to use in your working life?

I think honest and team-work would be good example when applying into working life.

- What type of organization would you prefer? A big or a small one? Private or public? And why?

I prefer to work in small organization and private. Since in small organization, although I have to work more, I can gain more skills and knowledge which help developing myself faster. Beside, it can improve my network easier and have ability to meet more important people.

- What is important to you in life in general?

A discipline and hard-working in general are two factors that play important role in my life.

- Is there someone you look up to? Who and why?

Yes, I usually look up to my old teacher. He is a really good person not only in specification but also in social networking, although he is normal teacher and has small network, however, those his student are all well-educated and high-status people in social.

- When do you experience moments of flow? When you forget about time and are completely involved in what you are doing?

Whenever I read a good book, I forget about time flowing and involving in what am I doing.

- How important is success to you? And what does the word mean to you?

It is undeniable that success would mean a huge meaningful to me as it makes me gain more confident and trust not only social status but daily life. Beside it helps me gain more respects from other people who use to look down on me : )

- What if someone came by and offered you your Perfect Dream job?! What would it be? You can use your imagination! 😊

Well, it would yell up and celebrate it by a small party with my closed friends and relatives.

- What are you generally interested in? And (how) could this potentially apply to work?

I would say the accessibility of people with disabilities. And it is also one of my motivation for me to work on development and improve the quality of their life.

- How and why did you choose your major?

I choose ICT as my major because its flexible and there are many interesting subject of area that we can study furthers.

- Do you recognize any of these drives in yourself? : to be part of a larger whole, results, success, knowledge, harmony or order/rules? Which one(s)? How does this apply to work?

Order/rules with discipline would drive myself and it could be applied to work for the developing potential , strong and stable knowledge and mindset

- Do you have a motto in life? What is it?

Yes I have. It is: "Do not tell them your plan. Show them your result "

- If you could have any job in the world for a day, what would it be and why?

I would try tailor since my grandpa was used to be and I want to try to understand and sympathy with his effort once in raising my family.

- If you were to start a business, what would it be selling and what would be its purpose?

I always want to open my own coffee shop. It would sell high-quality and good coffee in my nation.

- What are topics you feel very strongly about?

Parallel computing and processing image.
